

## Online Student Workshop

# PIONEERing Solutions for the Smart City Challenge

15 April 2021  
11:00 – 14:00 CET

*Moderator*  
Stergios Mavromatis, NTUA

### Topics

- Civil engineering for carbon-neutral urban areas
- Safety, security and risk management for resilient cities
- Technology enhanced solutions for smart cities
- Service design for future sustainable cities
- Circular economy for urban citizens
- Sustainable urban life and tourism

The PIONEER Alliance, formed by six complementary European Universities aims at advancing cutting-edge knowledge and innovation for addressing current and future cities and urban citizens' needs.

PIONEER is motivated by the common ground and goals shared by the Partners together with their firm commitment to promote European values and serve societal needs.

The Alliance works towards developing a new generation of learners, knowledge producers and innovators for future cities and the society in general. The main objective is to co-create new European curricula by proposing innovative pedagogical solutions.

PIONEER campuses, located in 16 cities, will be centers of knowledge dissemination and education, on a local and Pan-European level.
