

# ESRF MEMBERSHIP:

## Catalyzing Greek Scientific Excellence

### About the workshop:

The European Synchrotron Radiation Facility (ESRF), NTUA, and NCSR Demokritos , with GrSUN, are hosting a two-day event. The first day focuses on informing decision-makers about Greece joining the ESRF, highlighting socio-economic and scientific benefits. Day two transforms into a scientific workshop, showcasing synchrotron applications in industry, health-biology, materials and cultural heritage. The workshop underscores the synchrotron's role in innovation across domains and advocates for Greece's ESRF membership.
